

SUSHMANTH CHINTHALA BOYINA

+91 6303504600 | sushmanth21@gmail.com | [linkedin.com/in/sushmanth21](https://www.linkedin.com/in/sushmanth21)

Professional Summary

Software Engineer with **4 years of experience** building **full-stack enterprise applications** and **AI-powered solutions** using **Python (FastAPI, Flask)** and **React.js**. Experienced in developing scalable backend services, modern frontend applications, and intelligent automation platforms with specialization in **Agentic AI** using **LangGraph, LLM orchestration, RAG, MCP Servers, and workflow orchestration**. Strong expertise in **system design, API development**, and delivering scalable and maintainable software solutions.

Technical Skills

Backend: Python, FastAPI, Flask, REST APIs, Microservices, OAuth 2.0, RBAC, JWT

Frontend: React.js, Redux, Redux Toolkit, JavaScript, Material UI, Bootstrap

Agentic AI: LangGraph, Multi-Agent Systems, LLM Orchestration, RAG, Tool Calling, MCP Servers, Workflow Automation

Databases: PostgreSQL, MySQL, Redis, pgvector, Neo4j

Integration & Enterprise Platforms: Microsoft Graph API, PowerShell, SharePoint Lists, API Integrations

Testing: Pytest, Jest

Professional Experience

Infosys Ltd.

Jul 2022 – Present

Technology Analyst

- Designed and developed **AI-powered enterprise applications and intelligent automation solutions** using Agentic AI, workflow orchestration, and modern application architecture.
- Built scalable **backend services and APIs** using Python (FastAPI, Flask) and developed responsive frontend applications using React.js for enterprise use cases.
- Implemented **Agentic AI capabilities** leveraging LangGraph, RAG, Tool Calling, MCP Servers, LLM orchestration, PostgreSQL (pgvector), and Neo4j to enable intelligent workflow execution.
- Contributed to **solution architecture, technical design, code reviews, engineering best practices, and team collaboration** to ensure scalable and maintainable delivery.

Senior Systems Engineer

- Led **architecture and design initiatives** for scalable, high-performance enterprise applications with focus on maintainability, reliability, and extensibility.
- Developed and optimized **full-stack solutions** using Python (FastAPI) and React.js, delivering scalable APIs and responsive user experiences.
- Built **automation capabilities** leveraging LLM integrations, workflow orchestration, and enterprise platform integrations while driving engineering standards.
- Conducted **technical reviews and implementation guidance** to improve application quality, performance, and delivery consistency.

Systems Engineer

- Designed and developed **backend services and frontend applications** using Python (Flask) and React.js for enterprise platforms.
- Implemented **performance optimization and maintainability improvements** to enhance reliability and overall application experience.
- Collaborated with **cross-functional teams** to deliver scalable solutions, refine requirements, and improve engineering quality.

Projects

Agentic AI Workflow Automation Platform

Technologies: Python (FastAPI), LangGraph, LangChain, FASTMCP, LLMs, Tool Calling, MCP Servers, Google ADK, A2A Communication, SSE, React.js

- Designed and developed an **Agentic AI platform** for automating complex **multi-step workflows** using orchestration and multi-agent architecture.
- Built **scalable orchestration services** integrating LLMs, external APIs, enterprise systems, and tools.
- Implemented **intelligent workflow execution** leveraging RAG, MCP-based integrations, and real-time response streaming.
- Developed **context management, workflow orchestration, and multi-agent coordination capabilities** to enable adaptive automation.
- Contributed across **architecture design, backend development, system integrations, and end-to-end solution delivery.**

Enterprise Unified Communication Platform

***Technologies:** React.js, Python (FastAPI, Flask), Microsoft Graph API, PowerShell Cmdlets, Webex APIs, Direct Routing, SBC, Azure Identity & Access Management (IAM), SharePoint Lists, Redis, MySQL*

- Developed and enhanced a **multi-tenant Unified Communication Platform** supporting provisioning, migration, reporting, and monitoring for enterprise clients.
- Designed and implemented **client-specific customizations** and scalable solutions to meet diverse business requirements.
- Integrated **Microsoft Graph APIs, PowerShell Cmdlets, and Webex APIs** to automate Teams provisioning and communication management.
- Improved application performance, reliability, and security through backend optimization and **Azure IAM integration.**

Education

Siddharth Institute of Engineering and Technology	<i>Aug 2018 – May 2022</i>
<i>Bachelor of Technology - Electronics and Communication Engineering</i>	Percentage: 91%

Certifications & Achievements

- Platinum Club Member (Top 1-3%) – FY26-27
- Microsoft Certified: Azure Fundamentals (AZ-900) | Jul 2025
- Insta Award – 2026
- Insta Award – 2024
